## PROFESSIONAL SUMMARY

Motivated and detail-oriented Java Full Stack Developer with hands-on training in building end-to-end web applications. Eager to leverage strong problem-solving skills and a result-oriented mindset to contribute to innovative teams in a real-world environment.

## SKILLS

- **Core Programming:** Java (Advanced)
- **Backend Technologies:** Spring, Spring Boot, Hibernate, Servlets, JSP, JDBC
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Databases:** MySQL
- **Tools & Others:** Postman (API Testing), Git & GitHub (Version Control), WordPress (CMS Basics), AWS (Basics)

## EDUCATION

**B.Tech | 2021–2025**
Sri Venkateswara College of Engineering, Kadapa
Percentage: 75%

**Intermediate (MPC) | 2019 – 2021**
Sri Sudha Junior College, Dhone
Marks: 928/1000

**SSC | 2019**
Sri Sudha High School, Dhone
GPA: 9.2/10

## PROJECTS

**PROJECT 1**
**ONLINE QUIZ SYSTEM**

- Designed and implemented the system using Java, JSP, Servlets, and JDBC for backend logic.
- Developed user registration and login modules with session handling and basic authentication.
- Implemented quiz functionality to dynamically load questions based on selected subject.
- Created score evaluation logic with instant result display (total marks, correct/incorrect answers).
- Designed MySQL database with tables for users, questions, subjects and score.
- Developed user-friendly web pages using HTML, CSS, and JSTL tags for quiz display.
- Ensured input validation and exception handling for robust and error-free operations.

**Project 2**
**Event Connect**
- Event Connect is a web-based event management platform that allows users to discover, create, and manage events seamlessly.
- The system enables administrators to add and manage event details, while users can register, log in, and view upcoming events through an interactive dashboard.
- Built using HTML, CSS, JavaScript, and Firebase, the platform focuses on providing a smooth user experience with real-time data handling and authentication.
